🖱 Website 🛡 Marine Corps

Skills

HTML (CSS),

Javascript (React, Node Js, Vue, JQuery, Express),

PHP (Laravel), **C++** (C), **MySQL** (sqlite)

Qualifications

- **Strong ability to create web pages from scratch using HTML, CSS, and Javascript.**
- **Repeated use of git version control to record and implement proper organization of branches for managing web content.**
- **Fundamentally developed team member and problem solver due to Marine Corps, and electrical industry experiences.**

Education

Winthrop University

Completed CS courses including Intro to web development, Data structures and Algorithms, and Web design

Gaston College

Completed courses in information technology, and intro to programming with C++

Projects

Breakfast-Picker

Fun little React project allowing you to choose food items you might be craving.

Top100 Runescape Scraper

Web scraper built with cheerio, and axios. Scrapes the top 100 items and Trade count totals for items, then writes them to a singular json file.

Portfolio Website

Personal portfolio website showcasing some of my front end skills.

Login-system— Complete PHP login system

An actually complete login system for users made in php.

OSRS GE Price Tracker

— Js price tracker for Old School RS

Great learning experience to fetch data from an api. The Api was live updated so the application pulled live price data through a search function made in vanilla js.

Typing Game— C++ user input game

Simple command line based game that prompts the user to type a randomly chosen name from a list in a time limit.
